

District Name	MESQUITE_ISD
Do you currently use a technical assistance provider?	True
Name of technical assistance provider	Steady State Impact
Phone	2149600950
Provider's email	garrett@steadystateimpact.org
How did the district and the technical assistance provider work together to develop the district's local designation system?	The district led the discussion to determine to pursue the Teacher Incentive Allotment. Our technical assistance provider was instrumental in helping us understand the components and requirements of the TIA system, answering clarifying questions, brainstorming various district options, providing resources and examples, and providing support to complete the application.
Please specify the role of the district and the role of the technical assistance provider.	
First Name of the Person Completing the TIA Application	Janine
Last Name of the Person Completing the TIA Application	Fields
TIA Application Position	Deputy Superintendent
TIA Application Phone	9722886411
TIA Application Phone Extension	
TIA Application Email	jfields2@mesquiteisd.org
First Name of Main TIA Contact	Janine
Last Name of Main TIA Contact	Fields
Main TIA Contact Position	Deputy Superintendent

PART A: TEACHER OBSERVATION RUBRIC AND APPRAISER CERTIFICATION

Which teacher observation appraisal rubric does the district use to measure teacher effectiveness?

T-TESS

PART B: GENERAL QUESTIONS

1. Does the district have a process to ensure that appraisers recertify every three years in compliance with §150.1012?

Yes

The district will implement a year-long teacher observation training and calibration plan to support instructional leaders in conducting high-quality T-TESS observations. In compliance with TEA directives, all T-TESS appraisers are required to complete the official certification process, which includes a two-day in-depth exploration of each of the required domains. Only those who have completed this certification may serve as official appraisers. The two required trainings will be provided by our local service center.

2. What initial certification process is required for teacher appraisers?

3. Does appraiser certification require a calibration component?

Yes

PART C: RELIABILITY OF TEACHER OBSERVATIONS WITHIN AND AMONG CAMPUSES

1. Are appraisers required to norm on scoring using the district's teacher observation rubric annually, either by conducting an in-person observation or video scoring?

Yes

2. Has the district reviewed the TIA Statewide Performance Standards for Teacher Observation and the TIA Statewide Performance Standards for Student Growth with teachers as an overall guide for how to determine designation levels?

Yes

3. How many total teacher appraisers are in the district?

3 or more appraisers

District with 3 or more appraisers

1. How will the district ensure that appraisers remain calibrated on both scoring and evidence, across appraisers, content areas, grade levels and campuses throughout the year?

District leadership and appraisers will participate in both video and in-person calibration activities at least twice annually. Discussions are focused on aligning evidence and scores to the rubric, so that all appraisers and district leaders can calibrate on scoring and evidence, including the following:

- a. Participating in an in-depth review of the T-TESS rubric with particular emphasis on “look-fors” for each dimension.
- b. Conducting calibration walkthroughs on at least 2 different campuses.
- d. Annually participate in one video calibration activity in which appraisers, teacher leaders and principal supervisors score and document evidence individually and then review and discuss scores as a team. In these calibration exercises, data will be gathered and analyzed by appraisers, content areas, grade levels and campus to ensure alignment to the T-TESS rubric.

#### PART D: TEACHER OBSERVATION TRENDS

1. District and campus leaders review teacher observation trends at least three times a year.

Yes

Campus administrators review reports from the campus data management system, Eduphoria, to analyze content, subject, and appraiser data by dimension. The team analyzes teacher observation data, compares trends in T-TESS ratings with current student growth data, and reflects on the observation protocol to identify and discuss potential skew in teacher observation trends.

2. How is skew in teacher observation trends identified at the campus level?

These discussions take place during quarterly data meetings and campus leadership team meetings.

- District personnel from School Leadership, Professional Learning, and Personnel to review reports from the campus data management system, Eduphoria. Together, they collaboratively analyze content, subject, and appraiser, and campus data by dimension. The team explores teacher observation data, compares trends in T-TESS ratings with current student growth data, and reflects on the observation protocol to identify and discuss potential patterns or skew in observation trends. These collaborative discussions take place during quarterly data meetings and campus leadership team meetings, with district partners offering support, insight, and thought partnership throughout the process. By subject, By grade, By appraiser, By campus, By dimensions of teacher appraisal rubric, By analyzing the data in systems such as Euphoria, the district can identify patterns and inconsistencies in observation ratings. This comprehensive review process allows for meaningful reflection on observation protocols and ensures greater inter-rater reliability.,
3. How is skew in teacher observation trends identified at the district level? (If only one campus in the district, please enter N/A.)
4. Which observation trends does the district review?

5. When review of trends at the campus and/or district levels identifies that appraisers are not calibrated locally, describe how the district will address both of the following issues:  
when appraisers rating are not calibrated and  
when evidence gathered for those ratings is not calibrated

a. When appraisers' ratings are not calibrated:  
The district will provide ongoing professional learning for all appraisers through the Instructional Leadership Team (ILT) and Assistant Principal ILT sessions, with a focus on deepening understanding of T-TESS rubric descriptors and expected performance levels. Appraisers whose rating patterns fall outside expected correlations with student growth data will receive additional targeted calibration support. This may include one-on-one coaching, small-group calibration sessions, and guided practice using common video observations and district-developed exemplars to ensure alignment with district-wide expectations.

b. When evidence gathered for those ratings is not calibrated:  
Appraisers will engage in professional learning focused on scripting quality, evidence selection, and alignment of evidence to T-TESS dimensions through ILT and AP ILT. For those whose evidence collection practices are not aligned with expected standards, the district will provide differentiated support, including collaborative evidence reviews, practice using annotated observation scripts, and feedback loops to improve the accuracy and consistency of evidence used to justify ratings.

#### PART E: CORRELATION OF STUDENT GROWTH DATA TO TEACHER OBSERVATION DATA

1. Describe the district's procedures/protocols to review for correlation between teacher observation and student growth data at the campus and district levels (if more than one campus in the district).
2. How often does the district compare teacher observation data with student growth data to determine if there is a positive correlation?

At the end of each quarter, district leaders in Professional Learning, Personnel, and School Leadership use Eduphoria Strive to examine the alignment between teacher observation data and available student growth data by appraisers, content areas, grade levels and campuses. This includes analyzing individual student growth measures in relation to teacher performance data and analyzing trends in campus ratings. If a negative correlation is identified between T-TESS ratings and student growth data, School Leadership will collaborate with campus leaders to investigate the root causes of the misalignment. Together, they will design and implement targeted professional learning and support to improve calibration and ensure greater alignment between instructional practices and student outcomes.

other

Identify lack of correlation in teacher observation and student growth data:

a) Identifying Lack of Correlation:

Each quarter, district leaders from School Leadership, Professional Learning, and the Data and Assessment teams collaboratively review trends from formal teacher observations and student growth data by appraisers, content areas, grade levels and campuses. This analysis includes generating campus-level and district-level scatter plots to visualize the correlation between T-TESS ratings and student growth measures. These reviews are conducted quarterly, aligned with the availability of updated student growth data. When patterns of misalignment emerge—such as high observation ratings with low student growth, the district will work with the campus to identify root causes.

b) Addressing Lack of Correlation:

Once trends are identified, district and campus teams work together to determine root causes of the misalignment.

If the issue lies with the student growth data, the district examines the alignment of student growth measures to the taught curriculum, the rigor and relevance of the assessments, and adherence to test security and administration protocols.

If the root cause is teacher instructional practice, the teacher will receive targeted coaching, mentoring, and support to strengthen instructional effectiveness.

If the misalignment is due to appraiser calibration, the district provides additional support through targeted professional learning, calibration sessions, and coaching. Appraisers may also be partnered with a highly calibrated colleague to strengthen observation accuracy and consistency.

3. How does the district a) identify and b) address lack of correlation when comparing teacher observation data to student growth data?

PART F: OBSERVATION/FEEDBACK SCHEDULE

1. Does the district appraisal system comply with §21.351 and/or §21.352?

Yes

2. Does the district use a mutli-year appraisal system for eligible teachers?

Note: if using a mutli-year appraisal system, both teacher observation data and student growth data must be from the same school year.

	No	
	Number of times per year (Teachers on a Probationary Contract)	Number of times per year (Teachers on a Non-Probationary Contract)
3. What are the district's requirements for the following:		
Number of scored full observations	1	1
Number of scored partial observations/walkthroughs	4	4
Number of unscored observations (of any kind)	0	0
Total number of scores required per each observable dimension of the rubric	1	1
4. If the district is using multiple scored observations, how will the district determine the observation scores that will be used for data submission and for determining designations?	The district will use the dimension score based on the full observation.	
5. The district understands that no teachers in eligible teaching assignments can be on an appraisal waiver during the 2025-2026 school year and agrees to comply with this requirement.	Yes	

Option 1

3rd party pre-test, 3rd party growth targets, 3rd party post-test

Answer questions for all assessments listed to the right:

Option 1

1. How did the district determine that each of the 3rd party assessments included in the local designation system was a valid and reliable measure aligned to the standards of the course for each eligible teaching assignment?

Note: Be sure to include answers for each 3rd party assessment being used for each respective category of teachers.

Option 1

2. What protocols/training does the district provide to teachers to ensure valid administration and security of the 3rd party assessments(s)?

Option 1

3. How does the district calculate a teacher's end of year student growth using the 3rd party assessment test results?

End of Year STAAR, iReady

The district will use iReady for K-3 Reading and Math and 9-12 RLA/English and Math as these assessments are commissioner-approved assessments, are aligned to the TEKS in these content areas/grade levels, and have the support of all stakeholders, including teachers.

End of Year STAAR is aligned to the TEKS in grades 4-8 and provides a transition tables to calculate student growth. These content areas/grade levels have the support of all stakeholders, including teachers.

We follow the same protocols used for STAAR, We follow the same protocols recommended by the 3rd party vendor,

The district will use iReady test results. The district will compare students' EOY test results to the expected growth target scores set for students at BOY by the third-party vendor to determine the percent of a teacher's students who met or exceeded expected growth targets. The district will take the number of students who met or exceeded growth divided by the total number of students in the teacher's class.

In grades 4-8, the district will use the STAAR transition tables to determine growth. Students who meet or exceed their expected EOY growth targets will be determined to have met the expected growth. The district will take the number of students meeting their transition table target divided by the total number of students in the teacher's class.

Option 1

4. How will the district use multiple assessments to determine end of year growth?

For teachers who teach both reading and math, the district will take the number of assessments where the growth target was met or exceeded, divided by the total number of assessment opportunities in a teacher's class.

Option 2

3rd party pre-test, district created growth targets, 3rd party post-test

Answer questions for all assessments listed to the right: Circle

Option 2

1. How did the district determine that each of the 3rd party assessments included in the local designation system was a valid and reliable measure aligned to the standards of the course for each eligible teaching assignment?

Note: Be sure to include answers for each 3rd party assessment being used for each respective category of teachers.

The district will use the Circle test from CLI for Pre-K literacy, as this test is a commissioner-approved assessment and has the support of our PreK teachers.

Option 2

2. What protocols/training does the district provide to teachers to ensure valid administration and security of the 3rd party assessments(s)?

We follow the same protocols recommended by the 3rd party vendor,

Option 2

3. Describe the process the district used to set expected growth targets. (Select from drop-down)

Percent Growth based on District Data  
Based on the wave one administration, the district will set a wave three target. The district will take the number of students in a teacher's class who met or exceeded their wave three target divided by the total number of students in the class.

Option 2

4. How does the district calculate a teacher's end of year student growth using the 3rd party assessment test results?

Option 2

5. How will the district use multiple assessments to determine end of year growth?

NA

## PART A: TIA PLANNING COMMITTEE

1. How were the members of the TIA Planning Committee selected in order to ensure that perspectives from a representative group of stakeholders were considered?
2. Which groups did the TIA Planning Committee include?

The district was dedicated to forming a TIA Planning Committee that included diverse representation from stakeholders across the district, encompassing a range of roles within the district, including district leadership staff. To ensure equitable representation on the committee, members were invited based on their expertise and roles in instructional and campus leadership, curriculum and instruction, and district-level decision-making. Additionally, efforts were made to ensure balanced representation in terms of department, years of experience, role, and race/ethnicity, ensuring that all perspectives were considered in the planning process.

District Leaders,

## PART B: STAKEHOLDER ENGAGEMENT

1. From which stakeholder groups did the district gather input and feedback while designing the local teacher designation system?

Teachers,Campus Leaders,District Leaders,

2. Provide an example of how feedback from stakeholder groups was implemented in order to strengthen, adjust or refine the local teacher designation system.

Extensive input was gathered from teachers and campus leaders regarding the components and weightings of the designation system, ensuring that a wide range of perspectives were considered in shaping the process. Recognizing that 40% of the designation depends on the Teacher Observation, our district has conducted a thorough review and overhaul of the training, resources, and implementation of our TTESS evaluation practices to enhance their effectiveness and alignment with our goals. This comprehensive revision includes the development of more targeted training materials, the introduction of additional resources for both teachers and evaluators, and a commitment to ongoing, collaborative professional development. In addition, campus administrators will engage in regular, dedicated sessions to calibrate scoring practices, ensuring consistency and accuracy in evaluations. This continuous collaboration will allow for a more precise and meaningful application of the Teacher Observation component, ultimately strengthening the reliability and fairness of the designation system.

3. How were other teachers and other stakeholders both involved in the development of the plan to distribute TIA funds and informed about the final version of the spending plan?

Ongoing feedback was gathered throughout the process, with specific input regarding the distribution of TIA funds obtained during our district focus group meetings. These sessions provided an opportunity for stakeholders to share their concerns, suggestions, and insights, which were invaluable in shaping the final plan. Members of the TIA Planning Committee took the initiative to follow up with individuals to ensure that their feedback was fully understood and considered. As we collected and analyzed feedback, our plan was continuously refined, with particular attention given to the criteria for determining eligibility for designations in the first year. This iterative process allowed us to respond to questions and address concerns in real time, ensuring that the system reflected the needs and perspectives of all stakeholders. The final list of eligible teachers was shared, accompanied by a message emphasizing that this list is not static and can be revisited and adjusted each year, allowing for flexibility and continuous improvement in the designation process.

#### PART C: STAFF ACCESSIBLE RESOURCES

1. How will the district ensure that all teachers understand the requirements for teachers in eligible teaching assignments to earn a designation?

The district plans to hold several informational sessions and forums that allow an open pathway of communication for teachers interested in pursuing TIA. These informational sessions will serve to a) provide pertinent TIA background information and b) answer any questions that arise during the process. Having several of these meetings will allow the TIA committee, teachers and principals to revisit key areas that may need more clarification and thought.

2. What training materials will be provided for both teachers and school leaders to assist in a smooth roll out of the district's local teacher designation system?

The district has created a webpage that will go live on the district website following system application approval at the beginning of the school year. From this page, teachers, campus leaders and district officials will be able to view what makes up the designation system and how they will navigate it. In addition to a webpage, several TIA resources will continuously be funneled to teachers and school leaders via the TIA committee through employee communications and routine in-person follow-ups.

#### PART D: SUPPORT TO EARN A DESIGNATION

1. Provide evidence that demonstrates that teachers, district leaders, and school board members have a clear understanding of the district's proposed local teacher designation system, and support it.

The district has hosted multiple feedback and focus group sessions wherein the participants were able to ask questions in order to fully grasp the proposal. The district will continue to host question and answer sessions, solicit feedback, and incorporate surveys to ensure the understanding of all stakeholders.

2. What supports will be given to all teachers in eligible teaching assignments to help them qualify to earn a designation and how will the available supports be communicated to teachers?

Resources will be shared through staff meetings, direct emails, weekly staff newsletters, and district professional learning opportunities. Professional learning and individual instructional support will be integrated into all district efforts to help teachers qualify for a designation. Teachers will meet with campus and district leaders at multiple points throughout the school year to ask questions, provide feedback, and follow up on their progress. Campus leaders will have multiple opportunities to share feedback with district leaders, ensuring the necessary information is available for reflection and improvement in the TIA process. The TIA development team will hold ongoing and consistent meetings to assess teacher progress, address any questions or needs, and create a plan to provide the necessary support for teachers' success.

#### PART E: REGULAR COMMUNICATION UPDATES

1. Which stakeholders will the district include in regular updates?

Teachers, Campus Leaders, District Leaders,

a. Teachers are notified in-person by the district administrator that they are being put forth for designation as soon as the data is submitted for verification. When all data is submitted and verified, campus or district leaders will notify both in-person and in writing the teachers who have been submitted for designation. b. In late April, following the data submission, and after the district has received final notification of designations, teachers will be informed personally in a face-to-face meeting with their campus principal and Executive Director of Leadership Development whether the recommendation has been approved or not. Following these meetings, and upon confirmation of a successful application, this

2. How and when will the district communicate to teachers that they are being put forth for a designation and that they officially earned a designation?

information will be communicated via informational newsletters and webpages. These teachers will be recognized at a spring school board meeting.

The approved TIA local designation system and its components which include the TIA Toolkit and the district Observation Calendar will be shared at the beginning of the school year with all staff during August inservice and designated planning days. The district will also share the approval with the School Board and TIA Advisory Committee in the early school year. All information will be posted to a dedicated district webpage. The district plans to create and utilize informational videos to share with all staff through employee newsletters and staff resources at the beginning of the school year.

3. How and when will the district share the final version of the local teacher designation system, once the district's system application is accepted in early August?

4. How will the district encourage teacher participation in the required Texas Tech Teacher Buy-In Survey upon acceptance of the district's system application?

Prior to the survey, principals will be given an overview to discuss with their staff during an inservice or planning day meeting. Principals will stress to teachers that a survey will be coming from Texas Tech and that they are required to complete this survey. Several reminders will be sent to teachers via district communication (weekly staff newsletters, direct email, campus communications) to complete the survey before the closing date. Executive Directors of Leadership Development will also follow up in person with campus leadership to ensure survey responses and goals are being met.

## PART A: DISTRIBUTION OF ALLOTMENT FUNDS

Percent of Allotment Going to Designated Teachers 70%	Percent of Allotment Going to other teachers on the campus 20%	Percent of Allotment being retained by the LEA (Max 10%) 10%
1. To confirm that your district's spending plan complies with statute, provide additional details outlining how the district will spend funds on other eligible staff and how the district will spend any portion of the allotment remaining at the district-level.	Please provide details around how the district plans to spend allotment funds going to non-designated teachers on the campus. Include eligible roles, how eligibility will be determined, and any other details. Twenty percent (20%) will be utilized for non-designated instructionally facing staff. The 20% will first be spent on teaching staff eligible for the district's local strategic compensation plan: Excellence in Teaching Incentive Program (ETIP). The purpose of the ETIP program is to build teacher capacity, recruit and retain teachers and provide professional advancement opportunities for teachers who remain in the classroom. Any remaining balance after support of ETIP will be distributed equally amongst all other instructionally facing staff at the campus.	Please provide details around how specifically the district plans to spend the percentage of funds reserved at the district-level to support the local designation system. Include whether you plan to spend any on professional development.
2. The district understands that it must spend all allotment funds, including any portion retained at the district-level, by August 31 each year.	Yes The district's plan is to spend all allotted TIA funds by August 31 of each year it receives an allocation. The stipend payment will be made as a one-time stipend in the June paycheck of each year.	The district will use the 10% to support the implementation of TIA, including but not limited to TRS contributions, professional development, and assessment costs. All funds will be spent in their entirety each year by August 31.
3. By what date will your district spend all TIA allotment funds? Please include details about the first year and subsequent years.		

## PART B: GENERAL SPENDING PLAN AND BOARD APPROVAL

1. What is the rationale for the distribution of allotment funds, and how does this align with district goals?	The distribution of allotted funds supports and aligns with the district's current efforts to attract, develop, retain and reward teachers. TIA funding supports the district's goal to promote high quality learning and reward effective teachers.
2. How and when will teachers receive TIA compensation? (If splitting the allotment among designated teachers and other teachers on the campus, please specify the plan for both.)	The district will issue a single lump stipend payment (excluding any stipend deductions) in June of each year and in all subsequent years. Payment for designated teachers and all other eligible teachers is the same.
3. The district understands that the school board must approve a budget that includes the expenditure of TIA funds prior to spending the allotment.	Yes

4. When (Month and Year) does the district expect the school board to approve a budget that includes the expenditure of TIA funds?

Note, this is not required to occur prior to application submission.

The Board of Trustees approves the budget and compensation plan by the end of June 2026. The budget and compensation plan will include the expenditure of TIA funds. If necessary, a budget amendment will also be submitted each June to capture additional TIA allocation(s) and expenditures.

#### PART C: MOVEMENT OF TEACHERS

1. The district understands that if a designated teacher leaves the district prior to Class Roster Winter Submission that they will not generate an allotment.

Yes

2. The district understands that the designated teacher's campus location at the time of Class Roster Winter Submission (February each year) determines the allotment amount generated and that allotment values vary based on campus rurality and socioeconomic need.

Yes

3. What is the district's plan for adjusting the distribution of funds if a designated teacher leaves the eligible campus/district after Class Roster Winter Submission? (Check one option from drop-down menu.) If the district is forwarding funds to some subgroups of teachers (such as, retiring teachers) but not to other subgroups of teachers, (such as teachers whose contracts have been terminated), select "Other" and please describe the district's plan.

Designated teachers who retire and complete their contract for each year will receive the stipend payment by June of each year per the spending plan. Designated teachers that retire before the end of their contract, take a lateral teaching role in another ESC 10 or ESC 11 school district, or break the contract before the end of the year will not receive the stipend and funds will be distributed to all other eligible teachers per the spending plan.

4. How will the district spend the funds that would have gone to the TIA designated teacher who left the district after Class Roster Winter Submission (i.e., teachers who generated an allotment but whose funds the district is retaining?)

Note: 90% must be spent on teacher compensation on the campus where the designated teacher worked by August 31st, annually.

The district will follow the same guidelines outlined in the 20% shared amount in the spending plan.

#### PART D: NATIONAL BOARD AND DESIGNATED TEACHER NEW HIRES

1. Will compensation for Recognized Nation Board Certified Teachers (NBCTs) follow the same spending plan as Recognized teachers who earned a designation through the district's local designation system?

Yes

2. Will compensation for newly hired teachers that were designated by another district follow the same spending plan as teachers who earned a designation through the district's local designation system?

Yes

## PART A: CENTRAL OFFICE SYSTEM SUPPORT

1. It is a best practice to include as many of the following areas of support as possible. By including areas of district support indicated below, the district acknowledges that all departments/personnel are aware of the district's participation in TIA and the timeline, and understand what will be required from their respective department. if "Yes" give an example of the district infrastructure support provided.

Human Resources support for recruitment, retention, and equitable distribution of designated teachers.	Yes
--	-----

Finance/Budget/Payroll support for expenditure of TIA funds	Yes
---	-----

Technology support for data management necessary for TIA	Yes
--	-----

Curriculum & Instruction support tied to valid and reliable student growth measures and teacher observation data	Yes
--	-----

Assessment support tied to the development and administration of student growth measures for all eligible teaching assignments	Yes
--	-----

Professional Development support for existing and aspiring designated teachers	Yes
--	-----

Legal support for overall implementation of TIA	Yes
---	-----

Human resources will provide support in identifying eligible teachers, providing T-TESS training throughout the district, compiling T-TESS data, and providing TIA introductions to our newly hired teachers.

Finance/budget/payroll will ensure funds are appropriately allocated in alignment to the district TIA application and within the set time constraints.

Technology support will provide the teacher eligibility list, student growth data, and T-TESS data to assist the accountability department in making calculations and data submission to TEA.

Curriculum and Instruction will support teachers and principals in developing common formative assessments and analyzing student data to provide tailored instruction according to student needs. They will also provide professional learning related to effective instructional practices and partner with principal supervisors to conduct classroom walkthroughs to calibrating teacher observations.

The Assessment team will ensure assessments are administered according to established protocols and that data is available to all district and campus personnel. They will also support teachers and principals in analyzing student data to provide tailored instruction according to student needs.

Throughout the school year, the Professional Development team will partner with the Curriculum and Instruction team and principal supervisors to provide teacher and administrator training related to the TIA model, the T-TESS appraisal system, and effective instructional practices.

Our legal counsel will ensure our local policy is aligned to the TIA system and that agreements related to contracts and policy are adhered to.

2. Name the specific roles/positions in the district (names of specific roles, not names of departments) that will be responsible for training and coordinating the above personnel to support the execution of the local designation system and spending plan?

The Deputy Superintendent, Assistant Superintendent of Teaching and Learning, Assistant Superintendent of Business and Operations, Assistant Superintendent of Personnel Services, Chief Innovation Officer, Executive Director of Assessment and Accountability, Executive Director of School Leadership, and Executive Director of Professional Learning.

#### PART B: PROGRAM EVALUATION AND USE OF DATA TO IMPROVE SYSTEMS

1. How will the district use teacher observation and student growth data to adjust professional development plans and/or staffing plans?
2. Will the district track and collect data that impact district goals such as teacher retention, recruitment, and compensation?

The district will review teacher observation trends and student growth data through multiple lenses, including subject area, grade level, appraiser, campus, and specific dimensions of the teacher appraisal rubric. Through that data analysis, the district can identify patterns, including strengths and needs, to inform tailored professional learning or personnel decisions.

Yes

#### PART C: DATA ANALYSIS AND SUBMISSION

1. What personnel position(s) in the district will be responsible for compiling and analyzing teacher observation and student growth data?
2. What data management system(s) does the district use to track teacher observation and student growth data?
3. How will the district ensure that all teachers in eligible teacher assignments have both teacher observation and student growth data during the data capture year?
4. What department/staff position(s) will make decisions regarding teacher designations?
5. Who/what personnel will track designated teacher placement/movement and eligibility for generating the annual allotment?

Executive Director of Assessment and Accountability

Eduphoria

The district will run Eduphoria reports quarterly to monitor completion of teacher observations and collection of student growth data.

Department of Assessment and Accountability

Personnel Services
